INDEX TO VOLUME 18

1976

Index to Authors and Contributors

ADAMS, R. D., *Paper* Measurement of the elastic moduli of structural adhesives by a resonant bar technique, 149
ALLAN, T., *Communication* Nonlinear analysis for one-way buckling of a laterally loaded column, 259
ARYA, V. K., *Paper* Creep of thick-walled orthotropic cylinders subject to combined internal and external pressures, 1

BARBER, J. R., *Communication* Thermal rectification due to distortions induced by heat fluxes across contacts between smooth surfaces, 256
BHATNAGAR, N. S., *Paper* Creep of thick-walled orthotropic cylinders subject to combined internal and external pressures, 1
BISHOP, R. E. D., *Paper* On the equations governing the free and forced vibrations of a general non-conservative system, 6
BRICKLE, B. V., *Paper* Re-examination of the proneness to derailment of a railway wheel-set, 131
BRUGES, E. A., *Paper* Flow calorimeter suitable for use up to 100 megapascals and 400°C, 121
BURNSIDE, B. M., *Paper* The immiscible liquid binary Rankine cycle, 79
BURROWS, C. R., *Paper* Use of interferometry as an aid to studying flapper-valve flow characteristics, 229

CHIA, C. Y., *Paper* Large deflection of unsymmetric cross-ply and angle-ply plates, 179
CHU, P. S. Y., *Research Note* Hysteresis loss in ball and roller bearings, 254
COLE, B. N., *Papers* Strength of cylinders containing radial or offset cross-bores, 279; Fatigue tests on specimens containing skew holes, 287
COPPENDALE, J., *Paper* Measurement of the elastic moduli of structural adhesives by a resonant bar technique, 149
CRAGGS, G., *Papers* Strength of cylinders containing radial or offset cross-bores, 279; Fatigue tests on specimens containing skew holes, 287
CROLL, S. G., *Paper* Distortion and buckling of long viscoelastic cylinders in pure bending, 167

DAVIES, M. G., *Paper* Effect of shaft eccentricity and whirl on sealing by a sleeve gland, 239
DAVIES, P. B., *Paper* Dynamic behaviour of passively compensated, hydrostatic journal bearings with various numbers of recesses, 292
DOWSON, D., *Paper* Study of the lubrication and dynamics of geometrically perfect, lightly loaded, cylindrical roller bearings with particular reference to shaft loci, 263; *Research Note* Film rupture in a dynamically-loaded, non-conformal contact, 303
DRIELS, M. R., *Paper* Reduction of pressure surge in a simple pipe flow system, 66
DYER, D., *Paper* Study of tensile stresses in a journal-bearing oil film, 46
DYSON, A., *Paper* Thermal stability of models of rough elasto-hydrodynamic systems, 11

EL-AINI, Y. M., *Communication* Nonlinear analysis for one-way buckling of a laterally loaded column, 260

FICENEC, I., *Papers* Strength of cylinders containing radial or offset cross-bores, 279; Fatigue tests on specimens containing skew holes, 287

GILCHRIST, A. O., *Paper* Re-examination of the proneness to derailment of a railway wheel-set, 131
GOSMAN, A. D., *Paper* Prediction of recirculating, swirling, turbulent flow in rotating disc systems, 142
GREITZER, E. M., *Paper* Compressor–diffuser interaction with circumferential flow distortion, 25
GRISWOLD, H. R., *Paper* Compressor–diffuser interaction with circumferential flow distortion, 25

HART, J. A., *Communication* Simple approximate treatments of certain incompressible duct flow problems involving separation, 164
HASOON, M. A., *Paper* Stability of viscous axial flow in the entry region of an annulus with a rotating inner cylinder, 221
HAWKYARD, J. B., *Papers* On the pressure distribution between stock and rolls in ring rolling, 184; Pressure distribution, roll force and torque in cold ring rolling, 196
HODGSON, D. C., *Paper* Platen deceleration as a mechanism of noise production in impact forming machines, 126
HOLLAND, M., *Paper* Pressurized member with elliptic median line: effect of radial thickness function, 245

JOHNSON, W., *Papers* On the pressure distribution between stock and rolls in ring rolling, 184; Pressure distribution, roll force and torque in cold ring rolling, 196
JONES, A. M., *Communication* Thermal rectification due to distortions induced by heat fluxes across contacts between smooth surfaces, 257

KOSHAL, D., *Paper* Slot-entry bearings for hybrid hydrodynamic and hydrostatic operation, 73

LAI, S. H. F., *Paper* Mechanical properties of electrodeposited iron foil, 19
LAITHIER, B. E., *Paper* Dynamics of Timoshenko beams conveying fluid, 210
LOCKWOOD, F. C., *Paper* Prediction of recirculating, swirling, turbulent flow in rotating disc systems, 142
LOUGHHEAD, J. N., *Paper* Prediction of recirculating, swirling, turbulent flow in rotating disc systems, 142

McCARTNEY, L. N., *Paper* Strain/time relations describing creep, 39
McGEOUGH, J. A., *Papers* Mechanical properties of electrodeposited iron foil, 19; Perturbation analysis of the electroforming process, 271
MacLAREN, J. F. T., *Research Note* An alternative scheme to solve the equations for unsteady gas flow, 161
McLEAN, D., *Paper* Strain/time relations describing creep, 39
McQUEEN, D. H., *Paper* On the dynamics of compressor surge, 234
MAHALINGAM, S., *Paper* Dynamic characteristics of a structure with modifications at its supports, 113
MAMALIS, A. G., *Papers* On the pressure distribution between stock and rolls in ring rolling, 184; Pressure distribution, roll force and torque in cold ring rolling, 196
MARKHO, P. H., *Paper* Study of the lubrication and dynamics of geometrically perfect, lightly loaded, cylindrical roller bearings with particular reference to shaft loci, 263
MARTIN, B. W., *Paper* Stability of viscous axial flow in the entry region of an annulus with a rotating inner cylinder, 221
MATTHEW, G. D., *Communication* Simple approximate treatments of certain incompressible duct flow problems involving separation, 166
MURTI, P. R. K., *Communication* Modelling of electrohydraulic control valves and its influence on the design of electrohydraulic drives, 164

O'CALLAGHAN, P. W., *Communication* Thermal rectification due to distortions induced by heat fluxes across contacts between smooth surfaces, 257

PAIDOUSSIS, M. P., *Paper* Dynamics of Timoshenko beams conveying fluid, 210
PASTRANA, O. F., *Research Note* An alternative scheme to solve the equations for unsteady gas flow, 161
PECKHAM, R. G., *Paper* Use of interferometry as an aid to studying flapper-valve flow characteristics, 229
PRABHAKARA, M. K., *Paper* Large deflection of unsymmetric cross-ply and angle-ply plates, 179

PROBERT, S. D., *Communication* Thermal rectification due to distortions induced by heat fluxes across contacts between smooth surfaces, 257

RASMUSSEN, H., *Paper* Perturbation analysis of the electroforming process, 271
RATH, A. K., *Paper* Transverse bending of cross-ply laminated circular cylindrical plates, 53
REASON, B. R., *Paper* Study of tensile stresses in a journal-bearing oil film, 46
REID, S. R., *Paper* Prediction of the wavelength of interface waves in symmetric explosive welding, 87
ROE, G. E., *Paper* A solution of the low-speed wheel flutter instability in motorcycles, 57; *Communication*, 261
ROWE, W. B., *Paper* Slot-entry bearings for hybrid hydrodynamic and hydrostatic operation, 73

SANJINES, A., *Research Note* An alternative scheme to solve the equations for unsteady gas flow, 161
SHARP, R. S., *Communication* A solution of the low-speed wheel flutter instability in motorcycles, 260
SHERIF, N. H. S., *Paper* Prediction of the wavelength of interface waves in symmetric explosive welding, 87
SINHA, P. K., *Paper* Transverse bending of cross-ply laminated circular cylindrical plates, 53
SMITH, E. H., *Research Note* Film rupture in a dynamically-loaded non-conformal contact, 303
STOUT, K. J., *Paper* Slot-entry bearings for hybrid hydrodynamic and hydrostatic operation, 73
SUMPTER, J. D. G., *Paper* Use of the *J* contour integral in elastic–plastic fracture studies by finite-element methods, 97

TANNER, L., *Paper* Use of interferometry as an aid to studying flapper-valve flow characteristics, 229
TAYLOR, C. M., *Research Note* Film rupture in a dynamically-loaded non-conformal contact, 303
THORPE, T. E., *Paper* A solution of the low-speed wheel flutter instability in motorcycles, 57; *Communication*, 261
TRAMSCHEK, A. B., *Research Note* An alternative scheme to solve the equations for unsteady gas flow, 161
TURNER, C. E., *Paper* Use of the *J* contour integral in elastic–plastic fracture studies by finite-element methods, 97

WAHED, I. F. A., *Paper* On the equations governing the free and forced vibrations of a general non-conservative system, 6
WESTLUND, R., *Paper* A qualitative evaluation of phenomenological creep rupture theories, 175
WHITEHEAD, D. S., *Research Note* Effect of mistuning on forced vibration of blades with mechanical coupling, 306
WOODWARD, R. L., *Research Note* Influence of surface preparation on machining forces and chip geometry, 159

Subject Index

Titles of papers are in capital letters

ADHESIVES, STRUCTURAL, MEASUREMENT OF ELASTIC MODULI BY A RESONANT BAR TECHNIQUE, 149
Asperities and local temperature rise in lubrication, 11

Bearing, journal, tensile stresses in oil film, 46
Bearings, ball and roller, hysteresis loss in, 254
Bearings, multirecess journal, theory, 292
Bearings, roller, lubrication and dynamics, 263
BEARINGS, SLOT-ENTRY, FOR HYBRID HYDRODYNAMIC AND HYDROSTATIC OPERATION, 73
Brass, machining of, 159
Brittle creep rupture mechanism, 175
Buckling of a laterally loaded column, *Communications*, 259

CALORIMETER, FLOW, SUITABLE FOR USE UP TO 100 MEGAPASCALS AND 400°C, 121
Chip geometry in machining, 159
Composites, graphite–epoxy: transverse bending of curved laminates, 53
  large deflection of plates, 179
COMPRESSOR–DIFFUSER INTERACTION WITH CIRCUMFERENTIAL FLOW DISTORTION, 25
Compressor surge, dynamics of, 234
Compressor systems, gas flow in, 161
Control valves, electrohydraulic, 164
CREEP OF THICK-WALLED ORTHOTROPIC CYLINDERS SUBJECT TO COMBINED INTERNAL AND EXTERNAL PRESSURES, 1
CREEP RUPTURE THEORIES, PHENOMENOLOGICAL, A QUALITATIVE EVALUATION OF, 175
Creep, strain/time relations, 39
CYLINDERS, LONG VISCOELASTIC, DISTORTION AND BUCKLING IN PURE BENDING, 167
Cylinders containing radial or offset cross-bores, strength of, 279
Cylinders, thick-walled orthotropic, creep of, 1

Damping in a general non-conservative system, 6
Derailment of railway wheels, 131
Diffuser–compressor interaction in gas turbines, 25
Discs, rotating and stationary, fluid flow between, 142
Dislocation theory, 39
Drop forging, noise from platen deceleration, 126
Duct flow problems, *Communications*, 164
Ductile creep rupture mechanism, 175
Ductility of electrodeposited iron foil, 19
DYNAMIC BEHAVIOUR OF PASSIVELY COMPENSATED, HYDROSTATIC JOURNAL BEARINGS WITH VARIOUS NUMBERS OF RECESSES, 292
DYNAMIC CHARACTERISTICS OF A STRUCTURE WITH MODIFICATIONS AT ITS SUPPORTS, 113
DYNAMICS OF COMPRESSOR SURGE, 234
DYNAMICS OF TIMOSHENKO BEAMS CONVEYING FLUID, 210

Elastic moduli of structural adhesives, 149
ELASTIC–PLASTIC FRACTURE STUDIES BY FINITE-ELEMENT METHODS, USE OF THE *J* CONTOUR INTEGRAL IN, 97
ELASTOHYDRODYNAMIC SYSTEMS, ROUGH, THERMAL STABILITY OF MODELS OF, 11
Electrodeposition: of iron foil, 19
  theory of electroforming, 271
Electroforming process, a perturbation analysis of, 271
Electrohydraulic control valves, modelling of, *Communications*, 164
Epoxy adhesives, elastic moduli, 149
Evaporation enthalpy, 121
Explosive welding, 87

FATIGUE TESTS ON SPECIMENS CONTAINING SKEW HOLES, 287
FILM RUPTURE IN A DYNAMICALLY-LOADED, NON-CONFORMAL CONTACT, *Research Note*, 303
Finite-element methods, 97
Flow calorimeter, 121
Fluid flow: in a reservoir-valve-pipe system, 66
  between rotating and stationary discs, 142
  along pipes, by Timoshenko beam theory, 210
  in annulus with rotating core, 221
  study by oil-film interferograms, 229
FORCED VIBRATION OF BLADES WITH MECHANICAL COUPLING, EFFECT OF MISTUNING ON, *Research Note*, 306
Fracture studies, elastic–plastic, 97

GAS FLOW, UNSTEADY, AN ALTERNATIVE SCHEME TO SOLVE THE EQUATIONS FOR, *Research Note*, 161
Gas turbines, compressor–diffuser interaction, 25

Hardness of electrodeposited iron foil, 19
Heat flow across contacts between surfaces, 256
Hydraulic system pressure surge, 66
Hydrodynamics, 66, 142, 210, 221, 229
HYSTERESIS LOSS IN BALL AND ROLLER BEARINGS, *Research Note*, 254

Impact forming, noise from platen deceleration, 126
Instability of motorcycles from low-speed wheel flutter, 57
INTERFEROMETRY AS AN AID TO STUDYING FLAPPER-VALVE FLOW CHARACTERISTICS, 229
Iron foil, electrodeposited, mechanical properties, 19

J contour integral in finite-element elastic–plastic fracture studies, 97
JOURNAL-BEARING OIL FILM, A STUDY OF TENSILE STRESSES IN, 46

Lagrangian approach to vibration analysis, 6
Laminated curved plates, transverse bending of, 53
Lubrication, 11, 46, 263, 303
LUBRICATION AND DYNAMICS OF GEOMETRICALLY PERFECT, LIGHTLY LOADED, CYLINDRICAL ROLLER BEARINGS WITH PARTICULAR REFERENCE TO SHAFT LOCI, 263

Machines: impact forming, noise from platen deceleration, 126
Machining forces and chip geometry, influence of surface preparation, 159
Matrix analysis of vibration, 6, 113
MECHANICAL PROPERTIES OF ELECTRODEPOSITED IRON FOIL, 19
Mechanical properties: electrodeposited iron foil, 19
polypropylene, 167
Metal forming: drop forging, 126
rolling, 184, 196
MOTORCYCLES, A SOLUTION OF THE LOW-SPEED WHEEL FLUTTER INSTABILITY IN, 57; *Communications*, 260
NOISE PRODUCTION IN IMPACT FORMING MACHINES, PLATEN DECELERATION AS A MECHANISM OF, 126

Oil film tensile stresses in a journal bearing, 46
Organic fluids for turbine operation, 79
Orthotropic thick-walled cylinders, creep of, 1

PERTURBATION ANALYSIS OF THE ELECTROFORMING PROCESS, 271
Pipes: fluid flow along, by Timoshenko beam theory, 210
gas flow in, 161
PLATES, CROSS-PLY LAMINATED CIRCULAR CYLINDRICAL, TRANSVERSE BENDING OF, 53
PLATES, UNSYMMETRIC CROSS-PLY AND ANGLE-PLY, LARGE DEFLECTION OF, 179
Polypropylene tubing, bending of, 167
PRESSURE SURGE, REDUCTION OF, IN A SIMPLE PIPE FLOW SYSTEM, 66
Pressure vessel, holed cylindrical, static burst and fatigue, 279
Pressures, internal and external, causing cylinder creep, 1
PRESSURIZED MEMBER WITH ELLIPTIC MEDIAN LINE: EFFECT OF RADIAL THICKNESS FUNCTION, 245

RAILWAY WHEEL-SET, A RE-EXAMINATION OF THE PRONENESS TO DERAILMENT OF, 131
RANKINE CYCLE, IMMISCIBLE LIQUID BINARY, 79
Resonant bar technique for elasticity of adhesives, 149
RING ROLLING, PRESSURE DISTRIBUTION BETWEEN STOCK AND ROLLS, 184
RING ROLLING, COLD, PRESSURE DISTRIBUTION, ROLL FORCE AND TORQUE, 196
Roller bearings, lubrication and dynamics, 263
Rolling of plain and profiled rings, 184, 196
Rolling-contact theory, 131
ROTATING DISC SYSTEMS, PREDICTION OF RECIRCULATING, SWIRLING, TURBULENT FLOW, 142

Scuffing in elastohydrodynamic lubrication, 11
SEALING BY A SLEEVE GLAND, EFFECT OF SHAFT ECCENTRICITY AND WHIRL, 239
Specific heat capacity, determination of, 121
STABILITY OF VISCOUS AXIAL FLOW IN THE ENTRY REGION OF AN ANNULUS WITH A ROTATING INNER CYLINDER, 221
Steel, En 26, fatigue tests, 287
Steering instability of motorcycles, 57
STRAIN/TIME RELATIONS DESCRIBING CREEP, 39
STRENGTH OF CYLINDERS CONTAINING RADIAL OR OFFSET CROSS-BORES, 279
Stress, internal, in electrodeposited iron foil, 19
Structures, effect of support modifications on dynamics, 113
SURFACE PREPARATION, INFLUENCE ON MACHINING FORCES AND CHIP GEOMETRY, *Research Note*, 159
Surge in centrifugal compressors, theory, 234

Tensile strength of electrodeposited iron foil, 19
Thermal rectification due to distortions induced by heat fluxes across contacts between smooth surfaces, *Communications*, 256
Thermodynamic properties of saturated water in liquid and vapour phases, *Corrigenda*, 95
Thermoplastic tubing, bending of, 167
Turbine thermodynamics, 79
Turbines, gas, compressor–diffuser interaction, 25
Turbo-machine blade vibration, 306

Valve closure and pressure waves in a hydraulic system, 66
VIBRATIONS, FREE AND FORCED, OF A GENERAL NON-CONSERVATIVE SYSTEM, EQUATIONS GOVERNING, 6
Vibration of structure, effect of support modifications, 113
Vibration of turbo-machine blades, 306

WELDING, SYMMETRIC EXPLOSIVE, PREDICTION OF WAVELENGTH OF INTERFACE WAVES, 87
Wheel derailment, 131
Wheel flutter instability in motorcycles, 57, 260

Yield stress of iron foil, 19
Young's modulus of iron foil, 19
